

Project Document

Abdallah Zaref

1 About My Project

I used some HTML and CSS codes to build a simple website that serves the purpose of the OpenSource project to work on GitHub. this is my project

1.1 HTML

I used HTML to create the code for the website and words and to show its general appearance

1.2 CSS

I used CSS to color and format my website

2 Working on GitHub

I created a new project on GitHub and worked on it by Pushing the tasks for the project. I Pushed CSS file, then I pushed HTML file and uploaded it, and the project became complete on GitHub.
